Contact number: +963 981118364 for calls (14:00 —> 20:00) (GMT+3)

Address: Syria-Lattakia / Open to travel to the UAE.

As a Software Engineer and Intermediate Project Manager, I am passionate about managing software projects. Currently, I hold the role of software project manager and technical consultant. Since 2021, I have been working as an iOS developer, assuming responsibility for publishing company apps to the App Store and spearheading the development of new applications, ensuring comprehensive management throughout the lifecycle. Also, I have a year of experience as a freelance logo designer and valuable expertise in UX design.

Because of my varied background, I always try to make well-informed decisions driven by the insights gained from my diverse experiences.

Education

- **Master in Technology Management (PMTM).**
 - ✦ SVU (Syrian virtual university - 2023 ... present.
 - **Bachelor's degree in Informatics Engineering, Department of Software and Information Systems.**
 - ✦ Tishreen university - 2018...2022
-

♦ iOS developer /2021 ... 2023/

- ♦ Develop iOS apps using SwiftUI.
- ♦ Publishing apps in app store.
- ♦ Maintenance iOS projects.

♦ Logo designer /2019 ... 2020/

- ♦ Designing logos and visual identity for small businesses.
 - ♦ Designing business cards.
-

* Main self projects projects — Software engineer

♦ Easy Study -project — Backend developer, System analyzer and Product owner /2022/

Js, strapi.io, Git, Postman, UML

Easy Study is a platform mainly developed to help with the management of the educational system at my university.

- o manage a team of my college mate.
- o analyze the system and set the requirements.
- o Design the system and make UML diagrams.
- o Design the database and implement it using SQL database with strapi.io.
- o Design custom APIs that work perfectly with mobile apps.

For more details, you can visit this [link](#).

♦ Show Me Lattakia -project — iOS developer, Backend developer, system analyzer and project manager /2022/

Swift, SwiftUI, Strapi.io, Postman

iOS app that shows the most famous location in my city Lattakia and helps you to find hotels there and make reservations.

- o Implement UI design using swiftUI.
- o Design the backend and implement it using Strap.io.
- o Design the APIs and connect them with the app.

♦ Smart Stadiums -project — iOS developer, UI/UX & project manager /2021/

Swift, SwiftUI, objective-c, git, Postman

iOS app allows you to create a football team and make reservations in football courts to set matches between your team and another team you choose, the match will be confirmed after the captain of the second team accepts your challenge.

- o Manage the developing team (5 members) (backend developers & web developers) and set schedules and responsibilities for each member.
- o design the UI & UX for the iOS app.
- o Implement the design with swift & swiftUI.
- o Connect the app with the custom APIs.
- o Collaborate with stakeholders (customers & team members) to get the best result.
- o Make presentations and documentation to explain the project to the customer and their managers.
